DETAILED ACTION

1. Claims 1 – 17 are allowed.
2. The following is an examiner's statement of reasons for allowance: applicant discloses a novel method of manufacturing a chip-size package where, in the context of the entire claim, a plurality of sprout-shaped metal bumps are formed on electrode pads, then a resin-sealing layer is formed on the surface of the bumps so that the tip of the bumps are projected from the resin, and forming a plurality of wiring patterns on the resin-sealing layer which are electrically connected to the tips of the bumps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches methods of forming chip-sized packages. Specifically, Tamaki *et al.* (US 6,157,080), Ohuchi (US 2003/0183947), and Onishi (US 6,590,293) teach sprout-shaped metal bumps. Test *et al.* (US 6,268,662) and Kimura (US 6,218,728) teach methods of forming metal bumps by forming a wire-bond on an electrode pad and then coating with a sealing resin. Sawai *et al.* (US 6,046,071), Ma *et al.* (US 6,586,836), and Wakabayashi *et al.* (US 6,603,191) teach methods of forming and dicing chip-sized packages.
4. A copy of the EAST search history is enclosed.
